Clemens-Seely, Katie, and Nicole E. Phillips
Effects of temperature on hatching time and hatchling proportions in a poecilogonous population of *Haminoea zelandiae* 189
Quilichini, Y., J. Foata, J.-L. Justine, R. A. Bray, and B. Marchand
Spermatozoon ultrastructure of *Gyliauchen* sp. (Digenea: Gyliauchenidae), an intestinal parasite of *Siganus fuscescens* (Pisces: Teleostei) 197
Ito, Atsushi, Masakazu N. Aoki, Kensuke Yahata, and Hiroshi Wada
Embryonic development and expression analysis of *Distal-less* in *Caprella scaura* (Crustacea, Amphipoda, Caprellidea) 206
Longley, Roger D.
Neurogenesis in the procerebrum of the snail *Helix aspersa*: a quantitative analysis 215
Unuma, Tatsuya, Sayumi Sawaguchi, Keisuke Yamano, and Hiromi Ohta
Accumulation of the major yolk protein and zinc in the agametogenic sea urchin gonad 227

VOLUME 221, NO. 3: DECEMBER 2011

RAPID COMMUNICATIONS

Hofstee, Jeanette, and Bruno Pernet
Evolutionary simplification of velar ciliation in the nonfeeding larvae of periwinkles (*Littorina* spp.) .. 239
Ohtsu, Kohzoh, and Shin-ichi Uye
Anomalous infrared taxis of an aquatic animal, the giant jellyfish *Nemopilema nomurai* (Scyphozoa, Rhizostomeae) 243

DEVELOPMENT AND REPRODUCTION

Ikeda, Hideki, Kohzoh Ohtsu, and Shin-ichi Uye
Fine structure, histochemistry, and morphogenesis during excystment of the podocysts of the giant jellyfish *Nemopilema nomurai* (Scyphozoa, Rhizostomeae) 248

SYMBIOSIS AND PARASITOLOGY

Detournay, Olivier, and Virginia M. Weis
Role of the sphingosine rheostat in the regulation of cnidarian-dinoflagellate symbioses 261

PHYSIOLOGY AND BIOMECHANICS

Goldenheim, William M., and Peter J. Edmunds
Effects of flow and temperature on growth and photophysiology of scleractinian corals in Moorea, French Polynesia 270
Motokawa, Tatsuo
Mechanical mutability in connective tissue of starfish body wall 280
Wang, Qun, Di-An Fang, Wei-Wei Li, Juan Wang, and Hui Jiang
A novel TCTP gene from the crustacean *Eriocheir sinensis*: possible role involving metallic Cu^{2+} stress . 290

NEUROBIOLOGY AND BEHAVIOR

Sulkowski, Mikolaj J., Mathieu S. Kurosawa, and Daniel N. Cox
Growing pains: development of the larval nocifensive response in *Drosophila* 300

ECOLOGY AND EVOLUTION

Higgs, Nicholas D., Adrian G. Glover, Thomas G. Dahlgren, and Crispin T. S. Little
Bone-boring worms: characterizing the morphology, rate, and method of bioerosion by *Osedax mucofloris* (Annelida, Siboglinidae) 307

* * *

Index for Volume 221 317

INDEX

A

Accumulation of the major yolk protein and zinc in the agametogenic sea urchin gonad, 227

Anchor ice and benthic disturbance in shallow Antarctic waters: interspecific variation in initiation and propagation of ice crystals, 155

Anomalous infrared taxis of an aquatic animal, the giant jellyfish *Nemopilema nomurai* (Scyphozoa, Rhizostomeae), 243

AOKI, MASAKAZU N., see Atsushi Ito, 206

Asexual propagation and regeneration in colonial ascidians, 43

B

Bioinformatic survey of *Haliotis midae* microsatellites reveals a nonrandom distribution of repeat motifs, 147

BISHOP, JOHN D. D., see Helen Nilsson Sköld, 126

BLOOM, ONA E., see Joel Smith, 18

Bone-boring worms: characterizing the morphology, rate, and method of bioerosion by *Osedax mucofloris* (Annelida, Siboglinidae), 307

BRAY, R. A., see Y. Quilichini, 197
